

Basket

By Katie

What is it

A basket is usually rounded container that you can carry around and put food and water in. A basket is an aboriginal invention

What is it made from

It is made from plants that include pandanus, palms and selected bark fibres.

How is it made

- These plants are woven and knotted and you might have to sow and then done ✓

Cane bicornual basket from
Rockingham Bay, Queensland
British Museum Oc,+1185

and I always tell people I've
been taught by master craftsmen

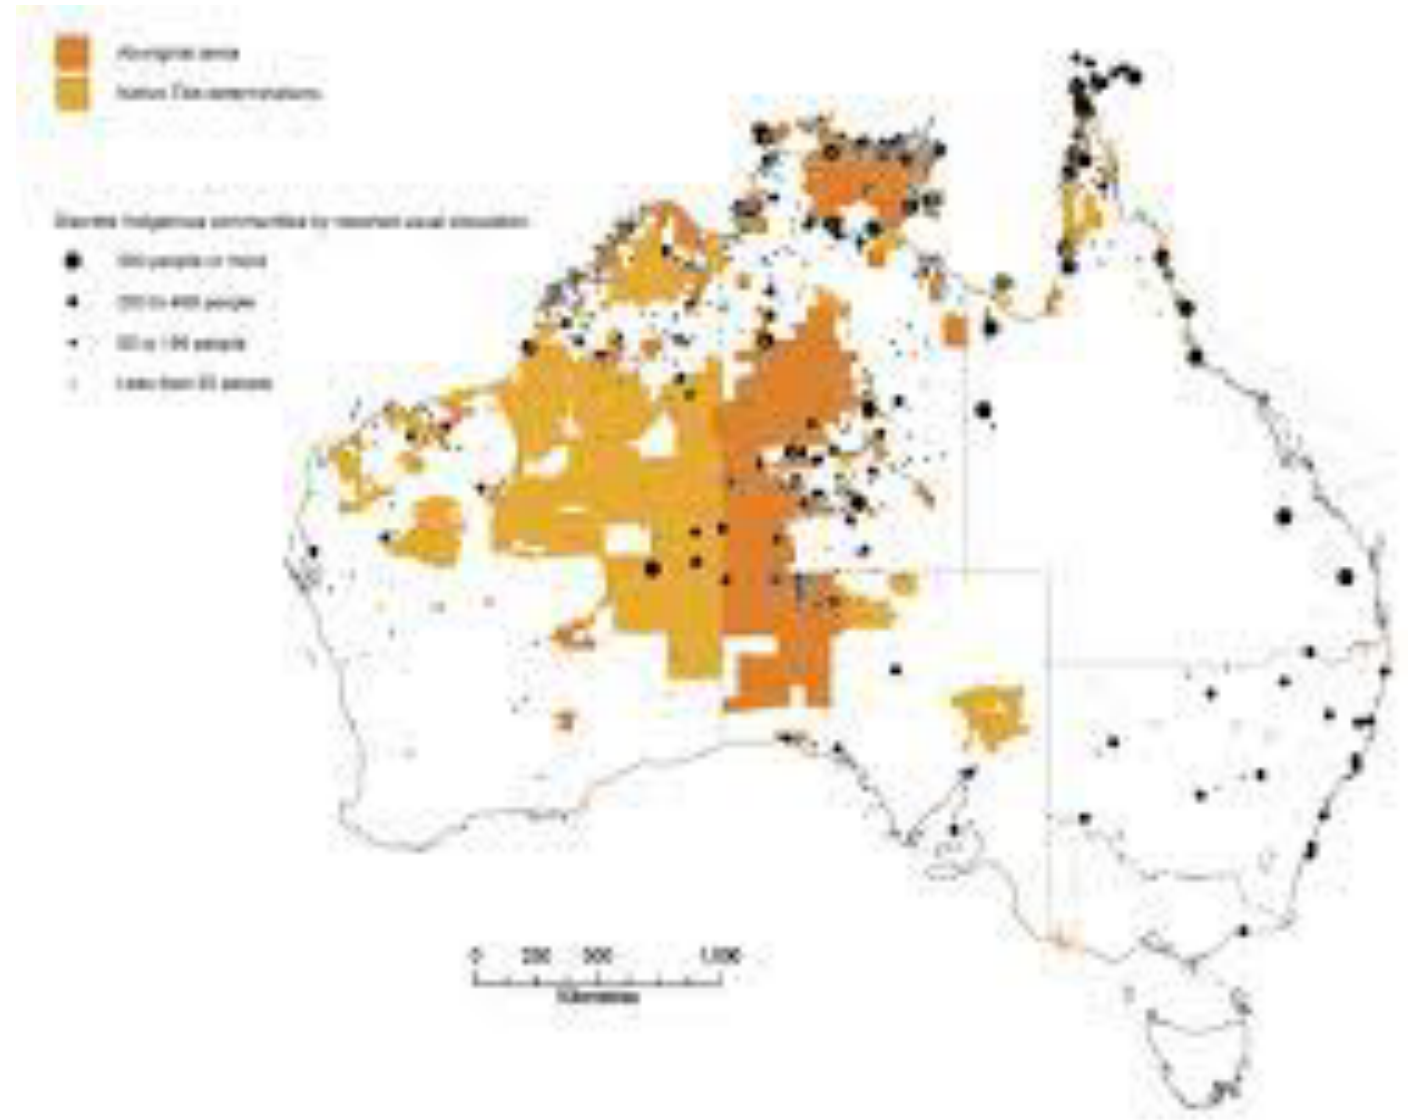

What is it used for

- It is used to help people carry things around. The bags are mainly designed and used by women to gather food.

Was it
used by
all
aboriginal

Yes the basket is
used by aboriginal
people everywhere

Thanks
