

Boomerang
By Matteo.

What is it ?

A boomerang is a very sharp object.Used by Aboriginal people.To hunt or kill animals.

What is it
made from?

- Most people make the boomerang of wood and the Aboriginal can do their painting on the boomerang.

How was the Boomerang made?

- **The Boomerang were made from a single piece of carved wood, they use all the trees to make it . The person who made it heated the wood and then bent it to get the right shape. Today some people still make it the same or buy it at the shops.**

What was the Boomerang used for

- They are used the Boomerang for **weapons for hunting birds such as the emu, kangaroo and other animals for eating.** You can throw it straight and it will come back for you and then if you aim for the bird you will hit and It will probably be dead.

Do people use the Boomerang same today ?

- They are used the same, like they did before. They are still used for hunting birds.

Was the Boomerang used for all the different Aboriginal groups?

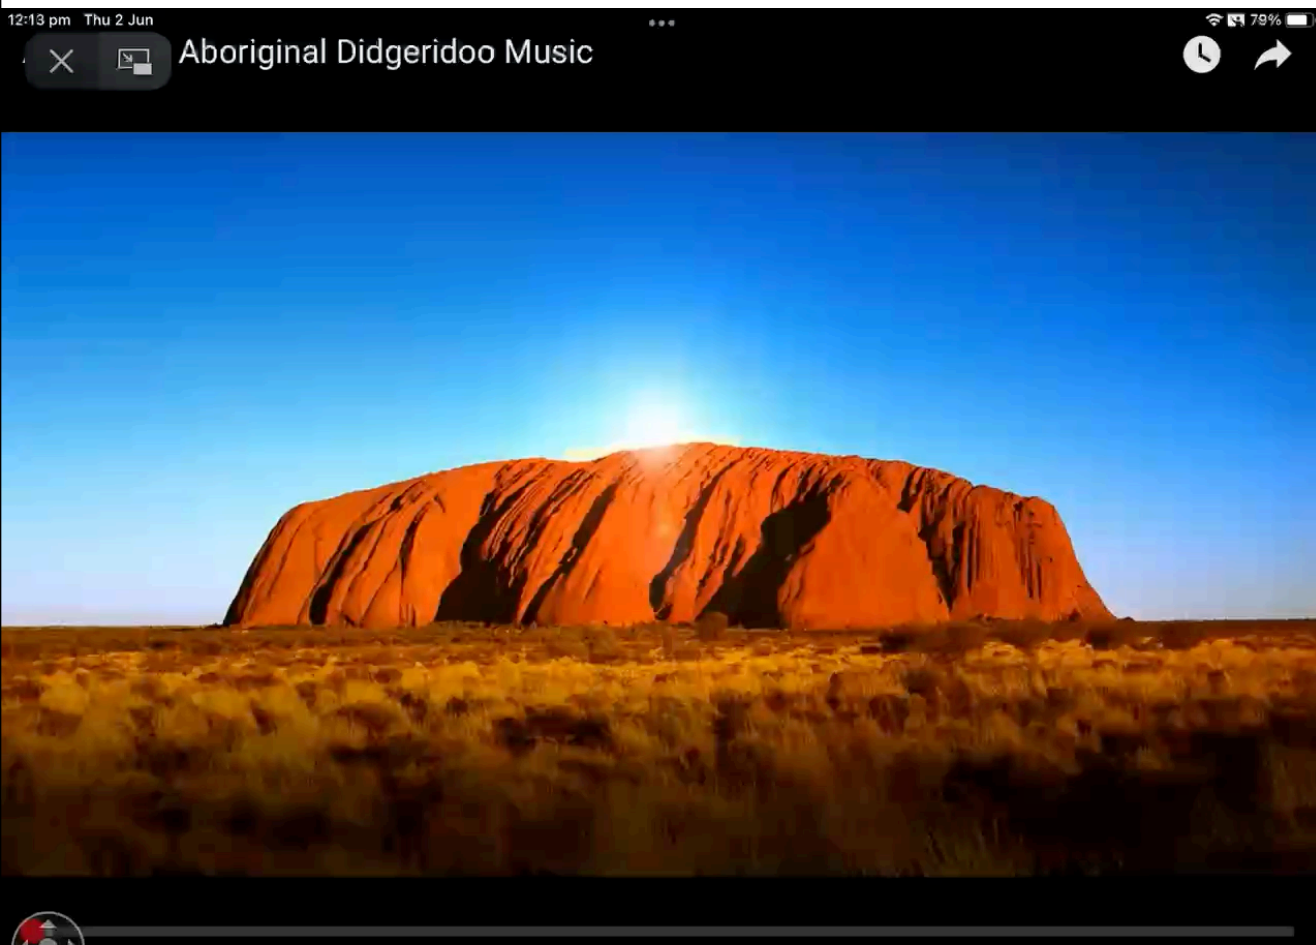

- The Boomerang was used by all the Aboriginal groups but they exchanged the Boomerang for other things, so that means that all the aboriginal groups have used it.
