

This power point
was created by
Zoe.

We had to choose an
adigital tool that
helped them and i chose.

The Aboriginal spear.

- This is an abariganal invention

What is it made from?

A big rock , thick or thin long
stick and they had tie use a
bit of plant to tie the rock and
stick Together .

How do you make it ?

- You sharpen a big rock, A thick or thin stick And they had to find a plant that could tie the rock and stick together.

What is it used for

To kill their food. So
they can have whatever
they killed for diner lunch
or brekfeest .

What do
people use
today for the
same
purpose .

Now days instead of the
spear they have used guns
and knives to kill animals .

Was it used
by all
aboriginal
language
groups?

Yes it was used by all
language tribes and it was
used for the same Reason.

I have made my own model of the spear.

- I made a spear by getting some air dry clay and a stick that I found then I also got some string and I wrap around the stick and colour it in brown.
